

Keyword Activation

Agent on the call can be activated by a Keyword instead of question – this is not replacing the questions that might be asked

Each keyword below triggers the agent to respond with a specific data-driven answer from the Ash Shati Ash Sharqi geodatabase.

Trigger words

district overview, land use, parcels, buildings, roads, schools, government services, commercial, fire safety, infrastructure, zoning, planning, digging, population, value

Keyword-to-Answer Mapping

Below is the mapping of each trigger keyword to the specific data-backed response the agent should deliver. When the client says any of these keywords or phrases, the agent activates and responds with the corresponding answer.

Keyword: district overview

Response: Ash Shati Ash Sharqi is a major coastal district in Dammam, Eastern Province. It has a registered population of 16,380 residents and covers a computed area of 4.48 square kilometers with a perimeter of 12.2 kilometers. The district falls under the Eastern Province Municipality and contains 2,676 land parcels, 1,979 buildings, and a 128.9-kilometer road network across 217 named streets. It is one of the most developed and well-served districts in the Dammam metropolitan area.

Keyword: land use

Response: The district contains 2,676 land parcels. The dominant use is residential with 1,966 parcels, representing 73.5% of total land. Commercial parcels account for 248 plots. Religious facilities including 22 mosques and 46 associated housing units occupy 68 parcels. Educational facilities take 12 parcels, while 37 parcels are designated as public parking. Other uses include water wells, pump stations, electrical rooms, a fuel station, a post office, a municipal branch, and a general hospital.

Keyword: parcels

Response: There are 2,676 land parcels with a total measured area of 2.69 square kilometers. The median parcel size is exactly 750 square meters, with a minimum of 16 square meters and a maximum of 30,265 square meters. Currently, 2,256 parcels are fully developed, representing an 84.3% development rate. A total of 1,478 parcels hold active building licenses, and 123 are designated as municipal investments. The district contains 4,234 registered residential and commercial units, with 1,524 parcels containing two units each and 556 containing a single unit.

Keyword: buildings

Response: The district has 1,979 standing buildings based on the building footprint layer, covering a total ground footprint of 634,565 square meters. The median building footprint is 216 square meters, while the largest structure reaches 10,532 square meters. Additionally, the municipality has issued 1,012 active building permits. The dominant building condition is standard residential with 60% lot coverage, a maximum of 2 floors, and a 10-meter height limit, which applies to 2,132 parcels.

Keyword: roads

Response: The district features a comprehensive 128.9-kilometer road network consisting of 220 road segments with 217 uniquely named streets. The three major arterial corridors are Prince Mohammed bin Fahd Road at 24.1 kilometers, King Abdullah bin Abdulaziz Road at 21.2 kilometers, and Al Khaleej Gulf Road at 17.8 kilometers. The road infrastructure is supported by 1,829 street light poles, 591 pavement segments covering 262,277 square meters of walkable surface, and 69 licensed advertising signs concentrated along the main corridors.

Keyword: schools

Response: The district hosts 14 registered educational facilities covering all stages. The largest by capacity is Noor Al-Islam Primary School with 418 students, followed by Noor Al-Islam Intermediate at 396 and Al-Bassam Primary at 375. The district also offers international programs through the Al-Bassam International complex, with Primary at 250 capacity, Intermediate at 160, and Secondary at 80. Additionally, Al-Hussan Model Schools provide dedicated kindergarten and primary education for girls. All schools are supervised by the General Administration of Education in the Eastern Province.

Keyword: government services

Response: The district hosts 20 official government facilities. These include the Administrative Court, the Human Rights Commission, the North Dammam Civil Defense Center, the Civil Affairs Office located inside Al Shati Mall, the Women's Labor Office, the Real Estate Development Fund Dammam branch, two Absher self-service kiosks for 24/7 citizen access, the General Directorate of Water, and Al Shati Power Station Number 2 operated by the Saudi Electricity Company. There are also 42 public facilities, 38 of which are designated public parking lots.

Keyword: commercial

Response: The local economy is driven by 303 commercial establishments. Major anchors include Al Shati Mall, Lulu Hypermarket, Panda, and Pandati supermarkets. Healthcare is served by multiple branches of Al-Dawaa Pharmacy and Arkestra Pharmacy. Dining options

include Applebee's, Layalina Restaurant, and Aryaf Al-Dammam. Automotive services include SASCO fuel station and Petromin Express. Retail includes City Max, Al-Mutlaq Furniture, and Twenty4. The district also hosts corporate offices like MSC Saudi Mediterranean Shipping Company.

Keyword: fire safety

Response: The district is equipped with 265 fire hydrants strategically distributed across the residential and commercial blocks. This provides a coverage ratio of approximately one hydrant for every 7.5 buildings, which is a strong safety metric. The Civil Defense is also present through the North Dammam Field Safety Center located within the district. Water pressure for firefighting is supported by 4 municipal pump stations managed by the General Directorate of Emergencies and Crises.

Keyword: infrastructure

Response: The district's infrastructure includes 1,829 street lights, 591 pavement segments covering 262,277 square meters, 265 fire hydrants, 4 pump stations, and 69 advertising signs. The municipality also manages 136 point-based and 253 line-based digging permits for ongoing infrastructure upgrades, including electricity distribution lines, fiber-to-the-home installations, low-voltage cable extensions, and traffic signal maintenance. The total road network spans 128.9 kilometers.

Keyword: zoning

Response: Building conditions are strictly regulated. The dominant residential zoning allows 60% lot coverage, a maximum of 2 floors, and a 10-meter height limit, applying to 2,132 parcels. Standard commercial zoning allows 60% coverage, 4 floors, and 19 meters, applying to 116 parcels. High-density commercial zones allow 50% coverage, up to 10 floors, and 40 meters in height, applying to 77 parcels. The primary master plan 1/337 mandates a maximum height of 8 meters, a street setback of 1 meter, and a side setback of 5 meters.

Keyword: planning

Response: The district is governed by two approved subdivision plans. The foundational Plan 1/337, approved in 1408 AH, covers 7.23 square kilometers north of the Corniche Road with specific height and setback regulations. The secondary Plan Sh D 908, approved in 1423 AH, reorganized a 32,869-square-meter commercial section owned by Fawaz bin Abdulaziz Al-Hokair and Partners. The district is organized into four main neighborhoods: the Second Neighborhood Third Adjacency with 818 parcels, the Third Neighborhood Fifth Adjacency with 698, the First Neighborhood First Adjacency with 634, and the Fourth Neighborhood Seventh Adjacency with 516.

Keyword: digging

Response: The municipality manages 389 active digging permits in the district, split between 136 point permits and 253 linear trench permits. The most common work types include construction of electricity distribution lines with 13 permits, subscriber electrical extensions with 12, electrical cable installations with 12, low-voltage cable works with 9, FTTH fiber-optic network installations with 4, and traffic signal supply and maintenance with 3 permits. Line-based permits are categorized by zone, with 178 in central Dammam and 75 in eastern Dammam.

Keyword: population

Response: The district has a registered population of 16,380 residents. For context, the broader Dammam municipality that this district belongs to has a total population of 1,255,211 residents. The district's 4,234 residential and commercial units serve this population, with most parcels containing duplex-style two-unit configurations. The district's density, combined with 303 commercial establishments and 14 schools, reflects a mature, self-sufficient urban neighborhood.

Keyword: value

Response: The strategic value of this digital GIS capability is significant. Today, analyzing a single district like Ash Shati Ash Sharqi requires a GIS specialist to manually query 19 separate data layers, cross-reference thousands of records, and compile reports over days or weeks. With this AI-powered digital employee, the same analysis is delivered instantly and consistently. This model can be replicated across all 17 Amanas and their districts nationwide, dramatically reducing response times, ensuring data consistency, and providing leadership with on-demand decision support for urban planning, infrastructure investment, and service coverage optimization.
